

PAVER GUIDE

ADVANCING PERMEABLE

Walk on Water

Advancing permeable paving is cleaning water.
Cleaner water is the purpose of PaverGuide™.

PaverGuide™ is a structural base for paving systems. It is manufactured from recycled plastic and exceeds H-20 loading. PaverGuide™ is installed faster and cheaper than the stone it replaces, and at 90% void, it provides a massive rainwater reservoir and expansive infiltration surface. Use PaverGuide™ for increased productivity, increased profitability, and expansion of your clean, green, and professional image.

PaverGuide™ Features and Advantages

Design	Installation
Make any Sidewalk or Patio PERMEABLE	Minimize excavation and material logistics
3 1/2" Shallow Installation	Great for urban and suburban environments
Replaces 10" stone reservoir	Minimize traffic control expense
Easily avoid existing and shallow urban utilities	Grid lines simplify paver placement
Integrate with rain gardens and urban planting	Easily connect 4" pipe
Exceeds H-20 loading	Lightweight: 7 lbs per 3.33 sf
Great for tight sites and existing landscapes	Faster Cleaner installation
Create curves with 4" offset capability	Integrated paver restraint promotes speed

Product Dimensions

Grate: 24" X 20" X 0.25"
 Base: 24" X 20" X 3.25"
 Storage Volume: .24399 cf/sf 1.825 gal/sf
 Equivalent to 3.15 inches standing water
